

Environmental Policy

Valvology are committed to the principles of environmental sustainability, the prevention of pollution, minimisation of waste and conducting all operations in an environmentally responsible manner.

The Company has adopted International Environmental Management Standard ISO 14001:2015 as the means by which it will control and continually improve environmental performance. We have a transparent and highly accountable approach to our environmental performance and this Policy and other relevant information is freely available to the public and other interested parties.

This Environmental Policy applies to all our operations regardless of where they are located.

Our Environmental Policy is that we will:

- ✓ Contribute in a meaningful and beneficial way to protecting the environment in which we operate to ensure sustainability through minimising waste, recycling, preventing pollution, reducing energy use and respecting the natural environment;
- ✓ Achieve continual improvement, through evolution of our procedures and adoption of technologies which will be applied to further improve our environmental efficiency and performance;
- ✓ Strive to integrate environmental considerations into all business decisions;
- ✓ Take precautions to prevent incidents that may cause environmental harm and have in place tested emergency response procedures to mitigate harm if an incident occurs;
- ✓ Be committed to compliance with applicable legal requirements and with other requirements that are applicable to the environmental aspects of our operations;
- ✓ Regularly review our environmental performance to ensure that it is current and relevant to our business, our interested parties, and the expectations of our customers;
- ✓ Promote the use of sustainable and renewable resources where available;
- ✓ Strive to protect and promote biodiversity and ecosystems within our geographical operations;
- ✓ Establish and monitor objectives for our environmental performance that are consistent with this policy.
